

Otters weekly update – week beginning 17th May

Time, please slow down, you are going far too fast! Another week has flown by...

Next week:

- We are continuing to look at pets, we will be focusing on how to look after pets (thinking about our own pets if we have any), and thinking about the needs of the pets. We will be revisiting instructions and we will be writing our own set of instructions on how to look after a pet.
- In numeracy, we are looking at capacity. We will be focusing upon the language (full, half full, empty, nearly empty etc.).
- As always we will be revisiting and playing games with our set 2 sounds.

Other things to remember:

- Please remember to read as much as you can (label on Tapestry – Home reading)
- A gentle reminder- we change reading books **EVERY** Friday, please remember to bring in old books ready for new ones!

Owls weekly update – week beginning 17th May

What a wonderful and calm end to the week we have had.

Next week in English we are learning about Grace Darling and what she was famous for. In Maths we are looking at half of a shape and an amount. In Science we will be learning all about seed dispersal. I wonder if we can win the cup in PE next week? In RE we will begin to look at the Torah - can you find out what this is?

Remember to keep sending in your reading books and reading records each day.

Have a lovely weekend.

Woodpeckers weekly update – week beginning 17th May

We have had a busy week. We have learnt about water safety and the RNLI. We have learnt about the different parts of a plant and have been busy measuring, comparing lengths and extending our writing!

Next week:

In English we will be doing some non-fiction writing and 'hot seating' a character from 'The Boy who Unplugged the Sea'. We will also be completing some comprehension and inference activities.

In Maths we are solving problems in relation to length. We will then move on to a new unit looking at time. We will focus on o'clock and half past, extending this to quarter past and quarter to where children are able. We will also be problem solving using time.

In Science we will be exploring seed dispersal and the different ways seeds are dispersed. We will be outside looking for dandelion clocks!

In Geography we will be looking at the oceans across the world and creating a fact book.

We will continue to focus on handwriting and SPaG (spellings, punctuation and grammar).
