

Otters weekly update – week beginning 14th June

Welcome back!

Next week we are:

- Continuing to look at farms – what animals live on a farm, what do farmers do etc. We will be thinking about writing a fact file to tell someone about a farm.
- In numeracy, we are looking at money and how to add money (values) together.
- As always we will be revisiting and playing games with our set 2 sounds.

Other things to remember:

- Please continue to read and record your reading on Tapestry.
- We change books on a Friday.
- Now the hot weather has finally arrived, please ensure your child has a school sun hat (or a sun hat, but not a cap please), sun cream on before arriving at school and, most importantly, a water bottle!

Owls weekly update – week beginning 14th June

What a great week we have had!

Well done for all your hard work - we are very proud of you.

Next week in English we are finding out about and writing fact pages about different sea creatures. In Maths we are counting forwards and backwards to 100 and recapping partitioning. It is Healthy Eating Week so we will spend time looking at the different food groups. In Science we are looking at the features of specific ocean animals. In RE we are continuing to explore what a church is. We will continue our lighthouses in DT - they are looking really super already!

Have a lovely weekend.

Woodpeckers weekly update – week beginning 14th June

We have had a great week. Thank you for the resources you sent in for our lighthouses.

Next week:

In English and Maths we will be continuing our fun quizzes to identify any gaps in the children's understanding. These gaps will be used to inform our planning for the rest of the term.

In Science we will be looking at animals and their offspring, focusing on the different ways animals reproduce.

In Geography/History we will be exploring how the seaside has changed over time and comparing physical and human features in the present and past.

In Art we will be exploring observational drawing of shells.

In DT, we will be starting step 2 of our lighthouses: papier-mâché!

It is Healthy Eating Week next week so we will also be looking at how we can eat healthily and the importance of this.

What an exciting week ahead we have!!
