

# Week beginning 13<sup>th</sup> September

## Butterfly Class Weekly Update

What a super first full week we have had!

Next week in English we will focus on the story 'Toys in Space'. We have read this once already - can you remember what the book was about? In Maths we will continue to work on place value and will think about counting forwards and backwards (one more, one less).

In topic we are finding out about Christopher Columbus' journey. In Science we will be looking at materials and thinking about the difference between an object and the material that it is made from. In RE we will think about the question 'Who is God?' In DT we will be designing our very own moon buggies - how exciting!

## Dragonfly Class Weekly Update

### **Maths**

In Maths this week we have recapped Place Value. We have worked with numbers up to 100 and solved number problems.

Next week we will continue with Place Value and compare numbers as well as represent them in different ways and use part-whole models to make various two digit numbers. We will also continue to solve number problems.

### **English**

In English this week, we have been writing summer recounts. We will have several grammar lessons next week, where we will focus on plural noun suffixes and the prefix 'un'. We are currently recapping all of the RWI sounds and applying them in different sentence types.

We will also be benchmarking the children.

### **History/Geography**

We will be continuing to learn more about Columbus and his voyage and discoveries.

### **Science**

We will be building upon our understanding of materials by looking at natural and man-made materials.

### **DT**

We will be designing our own moon buggies (we will be creating them the following week!)

### **RE**

We will be looking at occasions which are special to Christians and considering why they are special to them.
