

## How do we provide a foundation of Science skills and knowledge in our early years?

### Seasonal changes

- Daily weather charts – discuss what the weather will be like each day
- Look at different weather around the world
- Look at and discuss each season throughout the year
- Sing songs and rhymes about the natural world
- Make observational drawings of the natural world including plants and animals (cross link to Humans including animals)

### What might these experiences look like?

- Record the daily weather as a class
- Go on seasonal walks (cross link to plants)
- Make a hibernation book, which animals hibernate?  
Paint water on the playground – how long does it take to dry in warm weather?
- Shadow puppets
