

Week beginning 4th July

Ladybird Class Weekly Update

As always, this has been a busy week, the time is definitely flying by. The children enjoyed their "move up" morning on Tuesday.

We continue to look at the set 2 phonics, using and applying the sounds to our everyday writing. We are looking at writing many dictated sentences using the different sounds.

We will not be introducing anymore Red words this year, so please do continue to look at the ones already learnt, continue to practise them.

We have finished our "what the ladybird heard writing" and next week we are looking at bees. We will focus on non-fiction texts about bees, writing and creating our own fact files.

In Numeracy, we will be looking at money, looking at 1p, 2p, 5p and 10p. The children will be looking at the values of each coin and they will go shopping in order to buy simple classroom things!

Things to remember: As always, please bring a water bottle (with water not squash in it). The weather is so changeable, that we advise you to bring in a rain jacket as well as a sunhat on those "in between" days!

Butterfly Class Weekly Update

Well done Butterfly class for working so hard this week.

Next week:

In English we are looking at putting our nouns, adjectives and verbs into grammatically correct sentences. Our guided reading books will be 'Floss'.

In Maths we are learning about money - please do have a look at the homework coming home this week.

In RE we would really like to make our churches using junk modelling - please do send some small boxes in to help us with this.

In Science we are thinking about how the length of the day is affected by the seasons.

In DT we are designing our very own moving minibeast picture.

In History we will complete our fossils.

Please do send water bottles and reading folders in each day.

Dragonfly Class Weekly Update

In English, we will continue to work on prayers for the Leavers' Church Service and will also be focusing on extending our sentences in our grammar learning.

In Maths, the children will be revising areas covered through the year. This week, the children will focus on addition, subtraction, multiplication, division, money and capacity. This includes solving problems using this knowledge.

In Science, the children will be investigating electrical circuits and how to make a light bulb light up!

In History we will finish off the making of our fossils.

In RE, all our units are completed for this year so we will be exploring Bible stories and their meanings and how these relate to our circumstances and lives, particularly focusing on transitions and change.

In DT - we will continue to make moving minibeast pictures and move onto evaluating these.
